|--|--|-----------------|
| End of year self-assessment | Student Name | Year: 2007/2008 |
| <p>Training is a complex process which involves many areas of learning, development and change. The questions below should help you reflect on some areas in which you should have a growing awareness and understanding of this process, including a growing ability to monitor, evaluate your growth, strength and weaknesses. Although it is difficult to do, please mark a point on the line showing how far you think change has taken place, and underneath comment, explanations or examples. In some questions you may feel you have little to say, or that you believe little or no growth has taken place: it is important to recognise this and to try and give the reasons for it.</p> <p><i>Your journal will be a rich resource for you in completing this document. It also provides us with evidence to support your conclusions about your growth. Please refer to your journal entries in compiling your final version of your self-assessment (an example of such a reference would be 'see Journal for Weekend 3, answer to qu 1(b)').</i></p> | | |
